PROJECT:

Project Name: Automatic Smart Helmet Using Embedded System.
Role : Team Leader
Description : Nowadays road accidents are increasing day by day because raiders are consuming alcohol and the death rate is increasing because of not using the helmet. The main target of the project is to design a smart helmet by using advanced features like alcohol discovery, accident identification, location tracking, fall detection, and wiping the rain drops on the helmet shield.
This makes it not only a smart helmet but also a point of a smart bike. It's mandatory to wear the helmet, without which the ignition switch cannot turn ON.
